My “lessons learned” from NGST/JWST & VLST for HDST:
1) HDST => the science says “go large” (25 m)
2) Partner with Exploration/Human Spaceflight/Robotics
3) Partner internationally
4) Assemble in orbit
5) Test/Verify in orbit
6) Move to the science orbit
7) Make intrinsically Serviceable
8) Exoplanets + Universe “Galaxy Birth to Another Earth” ©
9) Plan for One 25 m; be prepared to do Two
10) Think long-term (20+ years)
