

Michael Fox

Senior Infrastructure Engineer – Data Science Mission Office (DSMO)

Michael (Mike) Fox is a Senior Infrastructure Engineer at STScI working in the Data Science Mission Office. Mike did his undergraduate and graduate studies in Electrical Engineer at Georgia Tech. His work experience includes writing software for high performance reconfigurable computers, developing software drivers for communication chips, and developing high performance application server software. Mike also helped to develop a modern public Cloud service as a software developer, manager, and the Director of a Site Reliability Engineering team. At STScI Mike is focused on architecting solutions for the “Big Data” challenges that we face as the astronomical data collected and analyzed grows at ever increasing rates. Outside of work Mike enjoys sailing, kayaking, RC helicopters, and biking.
