

Myles McKay

Research and Instrumentation Analyst

Myles McKay is a Research and Instrumentation Analyst (RIA) for HSTs' Wide Field Camera 3 Instrument. As an RIA, Myles works on calibration programs to assist in support of the UVIS and IR detector. Before coming to Space Telescope Science Institute, Myles earned a Bachelor of Science degree in Physics from South Carolina State University. During his time in college, Myles earned multiple astronomy research internships at national research facilities studying a wide range of objects from stellar to extragalactic. Most recently, he worked on the Citizen CATE Experiment to observe the 2016 and 2017 total solar eclipse. Myles will continue his education in graduate school studying instrumentation and galaxy evolution at the University of Washington.
