

# Mac Audio settings for OSX, Jabber and WebEx

1. Visit the Computer Support Help Desk to obtain the Apple Earbuds.
2. Plug them into the “Headphone Jack” on your laptop or Desktop.
3. Open “System Preferences”.
4. Click “Audio” in the “Hardware” section.
5. Adjust your Audio settings to match.

1. Launch Jabber.
2. Click on “Jabber” and then “Preferences”.
3. Click “Audio”.
4. Adjust your Audio Settings to Match.

# Mac Audio settings for OSX, Jabber and WebEx

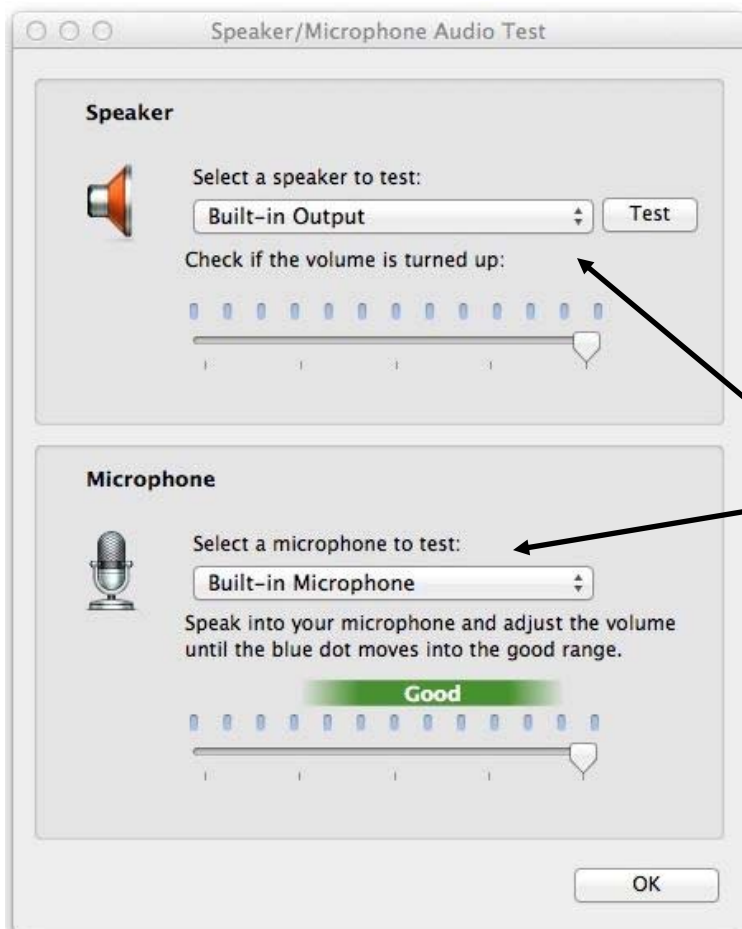

1. Join a WebEx Meeting as Host or Attendee.
2. An Audio Conference Dialog Box will appear.

Click here to call into your meeting.

**OR**

Click here to configure your Audio settings for your meeting.

***Do not select a USB audio device in these settings. Doing so will cause your WebEx Meeting to crash!***

Make sure your Speaker and Microphone settings look like this.

This will prevent your meeting session from crashing.
