Hi Beth,

I forgot to mention when I submitted the updated \*.aptx file that these change reduce the amount of telescope time used for the NIRSpec Fixed Slit observation by 0.2 hours. As a result, I would like to change the number of hours that I am contributing to the NIRCам Team in support of this observation from 2.5 hours to 2.3 hours. I would like to apply the 0.2 hours save to PID 1294 for which I am the PI.

Thanks for your time and help,  
Christine

Hi Christine,

I received your resubmission of program 1183, and I processed it. The changes you made to the NIRSpec Fixed Slit observation of HD 32297 look fine.

Cheers,  
Beth
