Subject: PID needed for GTO program
Date: July 11, 2023 at 10:51 AM
To: Tony Roman aroman@stsci.edu

Hi Tony,

I am putting together a GTO program to observe 1-2 stars for dust extinction studies. This program would use time that is a combination of at least my and Alberto Noriega-Crespo's spare GTO time. I have 1.3 hrs and Alberto has 0.7 hrs (<https://www.stsci.edu/cgi-bin/get-jwst-gto-time>). I am having email conversations with 2 other GTO stakeholders and so might even have a little more than 2 hours depending on their interests.

I've checked with Neill Reid and Christine Chen and have been told if I can get this program submitted in APT by Friday, then it will be in the queue for cycle 3. That would be awesome. Hence, I would need a new GTO time PID for this program with at least 2.0 hours allocation. I was directed to you to get such a PID issued. So, what is needed to get this PID?

I've CCed Alberto so he can confirm his participation if needed.

There will be other Co-Is involved in this program and I can provide a full list by Friday at the latest.

Cheers,
Karl.
