Hi,
Yes, OK to add a calibration target. I assume that there's no issue with duplications
Thanks
Neill

Subject: change to JWST GTO Program ID 1230

Hi Neill,

Catarina Alves de Oliveira, PI of 1230, has contacted me to ask if it is OK to add an observation 6 to observe a calibration target with NIRISS/AMI and link it to the observation 4? The additional time for this observation will come from NIRISS PI, Rene Doyon, allocated ~1.5h. Is this change OK to proceed with?

Thanks,
Shelly

External Email - Use Caution

Hello Shelly,

I simply wanted to inform you that I have asked Catarina Alves de Oliveira for a change in program ID 1230. As a member of the NIRISS GTO team, part of that program is charged to me through observation 4 (NIRISS/AMI).

I will want to add an observation 6 to observe a calibration target with NIRISS/AMI and link it to the observation 4. For that purpose, the NIRISS PI, Rene Doyon, allocated ~1.5h of additional time.

I expect Catarina to contact you directly but simply wanted to give you a heads up about it because the program might get scheduled soon.

Thanks and cheers,

Loic
