Summary – NICMOS (Tommy Wiklind) and COS (Tony Keyes) presented the final SMOV status updates. The small number of internals remaining for NICMOS SMOV was curtailed by the Oct. 22 SI C&DH lock-up. Any continuation of or revision to NICMOS SMOV will specified on the basis of the yet-to-be-determined method of NICMOS recooling and reactivation. A revised agenda for the SMOV Closure Review was discussed.

Details of each of these items are found in the associated meeting materials.
