Project 02 - Photo Retouch

100 pts

PROJECT DESCRIPTION

For this project, your goal is to retouch a photo to the final print state that has been provided. Areas where imagery is removed should be covered up flawlessly and without any artifacts - the image should look as convincing as possible. Value, texture, and color should be mimicked exactly from the starting photograph. Aim for a magical transformation when comparing the before and after images!

**Format:** A single Photoshop document (.psd)

**DUE BY THE END OF CLASS JULY 5th**
