webcasted

Experience images and stories
13 billion years in the making.

HUBBLE@25
An exhibition celebrating 25 years of the
Hubble Space Telescope including artifacts and spectacular images.
Now through September 14, 2015

APRIL 30, 7:00pm:
HUBBLE AND OUR ALTERED UNIVERSE

Join leading scientists as they discuss Hubble's most important scientific discoveries.
The panel includes **Sara Seager**, Massachusetts Institute of Technology; **Adam G. Riess**, Johns Hopkins University
and Space Telescope Science Institute; **Priyamvada Natarajan**, Yale; **Matt Mountain**, Space Telescope Science
Institute; and moderator **Ira Flatow**, host of *Science Friday*® on Public Radio International.

Intrepid Museum members receive a special discount for this event. For more information about membership,
tickets and the complete schedule of *HUBBLE@25* programming, visit intrepidmuseum.org.

News/Events

25th Anniversary Video Series – Expect the Unexpected

NASA's Hubble Space Telescope is one of the most powerful scientific instruments ever conceived. Hubble's most important discoveries have provided answers to questions that astronomers did not yet know how to ask, and found objects that were not yet imagined.

This installment of the "Hubble at 25" series looks at how Hubble far
