# CSA Perspective

JSTUC Meeting #1

STScI, 14-09-2017

Jean Dupuis

Senior Mission Scientist, CSA

Canadian Space  
Agency

Agence spatiale  
canadienne

Canada

# Background

- CSA is contributing the FGS and NIRISS
- FGS-NIRISS science team (PI: René Doyon, U de Montréal)
- CSA-supported team of scientists at STScI
- Expected share of guest observer time of 5% and guaranteed time (GT, 450h)
  - A program for JWST grants is developed at CSA to support Canadian guest observers and science team for GT.

# Objectives

---

- Seeking inputs from the JWST users community how to best serve them and maximize NIRISS usage.
- Get a better understanding of issues and concerns from the users perspective.
- Be informed about JWST science operations and maintain a good channel of communication.

# Current Activities

---

- Canadian mirror archive
  - In collaboration with CADC (long standing cooperation HST archive).
  - Could provide complementary advanced data products and services.
- Guest observers support
  - Exploring the possibility of having a Canadian JWST office to provide support to Canadian proposers and NIRISS expertise.
  - Need to insert our grant funding program in the NASA and STScI process.

# Conclusions

---

- Looking forward to begin observations and produce great science.
- Looking forward to work with the JSTUC committee during the mission and receive your feedback and advices.
- Thank you!
