250 Total Orbits Used

ABSTRACT

Using Director's Discretionary (DD) observing time, HST will undertake a revolutionary deep field observing program to peer deeper into the Universe than ever before and provide a first glimpse of JWST's universe. These Frontier Fields will combine the power of HST with the natural gravitational telescopes of high-magnification clusters of galaxies to produce the second-deepest observations of blank fields and the deepest observations of clusters and their lensed galaxies ever obtained.

The primary science goals of the HST FF are (1) to reveal $z \sim 5-10$ galaxy populations $\sim 10-50$ times intrinsically fainter than any presently known; (2) to solidify our understanding of the stellar masses and star-formation histories of galaxies at the earliest times; (3) provide the first statistically meaningful morphological characterization of $z > 5$ galaxies; and (4) to find $z > 8$ galaxies magnified sufficiently for spectroscopic followup and internal structure studies.

Six strong-lensing clusters -- Abell 2744, MACSJ0416.1-2403, MACSJ0717.5+3745, MACSJ1149.5+22, RXCJ2248.7-4431, and Abell 370 -- will be targeted with coordinated parallels of adjacent blank fields with ACS/WFC and WFC3/IR cameras. Observations for the first four cluster/blank field pairs will be obtained in HST Cycles 21 and 22, with two additional pairs to follow in Cycle 23 pending results of the initial observations. HST imaging will reach 5sigma depths of 28.7-29th AB magnitude for a point source in ACS F435W, F606W, F814W, WFC3/IR F105W, F125W, F140W, and F160W, at 140 total orbits

per field. All data for this observing program will be nonproprietary and available immediately upon entry into the Mikulski Archive for Space Telescopes. STScI will release fully calibrated

high-level science products ready for scientific analysis by the astronomical community shortly after the raw data are obtained

OBSERVING DESCRIPTION

TBD

Proposal 13496 - Visit 01 - HST Frontier Fields - Observations of MACSJ0416.1-2403

Thu Aug 21 01:05:05 GMT 2014
