ABSTRACT

This is an extension of SNAP-14840, aimed at exploiting some of the small gaps that are currently in the HST calendar each week to single-orbit image previously HST-unobserved NGC/IC bright galaxies through the F814W filter of the ACS/WFC. Targets in this program are all the targets listed in the original SNAP-14840 that don't have I-band-type observations (i.e., F775W, F814W, and F850LP) in either WFC3/UVIS or ACS/WFC. We included 5 targets (NGC2551, NGC4500, NGC4561, NGC4790, and NGC7130) that were originally excluded from SNAP-14840 because they were already observed through a V-band-type filter, but are still unobserved in I-band.

OBSERVING DESCRIPTION

2 ACS/WFC F814W exposures of 337 seconds each per target. Compact 2pt-dither pattern.

Proposal 15364 - Visit 01 - Extended F814W Schedule Gap Pilot

Orbit Structure	Orbit 1 Server Version: 20170613 The diagram illustrates the timeline of Orbit 1, which lasts 5500 seconds. Key events include: GS Acq: Ground Station Acquisition at the start of the orbit. Exp. 1: Exposure 1, marked with a green box and a double-headed arrow, occurring around 300 seconds. Pointing Maneuver: Indicated by a green box and a double-headed arrow around 800 seconds. Exp. 2: Exposure 2, marked with a green box and a double-headed arrow, occurring around 900 seconds. Unused Orbital Visibility = 1916: A period of 1916 seconds where the target is visible but not observed, shown as a green bar from approximately 1300 to 3200 seconds. Occultation: The target is occulted by the Earth, shown as a white bar from approximately 3200 to 5500 seconds. The timeline is marked with a scale from 0 to 5500 seconds in increments of 500.

Orbit Structure	Orbit 1 Server Version: 20170613 The diagram illustrates the timeline of Orbit 1. It begins with 'GS Acq' at 0 seconds. 'Exp. 1' is shown as a green box with a crosshair icon, occurring between approximately 200 and 400 seconds. A 'Pointing Maneuver' is indicated by a vertical line at approximately 800 seconds. 'Exp. 2' is another green box with a crosshair icon, occurring between approximately 900 and 1200 seconds. A period of 'Unused Orbital Visibility = 1924' is shown as a black bar from approximately 1200 to 2124 seconds. The 'Occultation' period is represented by a white bar starting at approximately 3200 seconds and ending at 5500 seconds. The x-axis is labeled 'sec' and ranges from 0 to 5500 with major ticks every 500 units.

	The diagram shows a timeline from 0 to 5500 seconds. A blue checkered bar from ~200s to ~1300s represents 'Unused Orbital Visibility = 1967'. A green bar from ~200s to ~3200s represents the 'Orbit Structure'. Within this green bar, 'Exp. 1' (green box) is at ~250s and 'Exp. 2' (green box) is at ~850s. A 'Pointing Maneuver' (green box) is at ~800s. 'GS Acq' is at 0s. 'Occultation' begins at ~3200s. Black bars on the timeline represent gaps or specific events.

Orbit Structure	Orbit 1 Server Version: 20170613 The diagram illustrates the timeline for Orbit 1, which lasts 5500 seconds. Key events include: GS Acq: Starts at 0 seconds. Exp. 1: A green box with a target icon, occurring between approximately 250 and 350 seconds. Pointing Maneuver: A green box with a target icon, occurring between approximately 750 and 850 seconds. Exp. 2: A green box with a target icon, occurring between approximately 850 and 950 seconds. Unused Orbital Visibility: A red label indicating a gap of 2156 seconds between the end of the exposure sequence and the start of the occultation. Occultation: A long white bar starting at approximately 3500 seconds and ending at 5500 seconds. The timeline is marked with a scale from 0 to 5500 seconds in increments of 500.

Orbit Structure	Orbit 1 Server Version: 20170613 The diagram illustrates the timeline for Orbit 1, spanning from 0 to 5500 seconds. Key events include: GS Acq: Green arrow at approximately 100 seconds. Exp. 1: Green box with a crosshair icon at approximately 300 seconds. Pointing Maneuver: Green box with a crosshair icon at approximately 800 seconds. Exp. 2: Green box with a crosshair icon at approximately 900 seconds. Unused Orbital Visibility = 1912: A period of 1912 seconds following the second exposure, indicated by a green bar. Occultation: A white rectangular block starting at approximately 3200 seconds and ending at 5500 seconds. The timeline is marked with a scale from 0 to 5500 seconds in increments of 500.
