ABSTRACT

This program will observe PN VY2-2 inside the field and near the center position using the WFC3 IR G102 and G141 grisms and at position previously observed. The data will be used to calculate wavelength solutions for the grisms, and will be compared with those derived from programs 11937, 12355, 12356, 13093, 14023, and 14993 to monitor for potential time evolution of the calibration.

OBSERVING DESCRIPTION

This program will observe PN VY2-2 inside the field and near the center position using the WFC3 IR G102 and G141 grisms and at position previously observed. The data will be used to calculate wavelength solutions for the grisms, and will be compared with those derived from programs 11937, 12355, 12356, 13093, 14023, and 14993 to monitor for potential time evolution of the calibration.

Observations are taken with postargs of (-20,0) (-20,+15) (-20,-15)
